

★KAVSTAR★ 2:11 PM

What interaction style is recommended for these sessions: active building or passive watching?

Darren Sweet 2:13 PM

I always try to build along, then if I get stuck or behind I stop, and just watch class.

Jan Davidson 2:22 PM

Can I build agents to re-engage Companies who were forced to close during covid? The majority of my contacts are no longer employed at these companies, and I don't have the bandwidth to reach out to one by one to a thousand companies to determine, and then recontact the proper contacts who buy my products...

Nathalia Carbajal 2:32 PM

I agree. Thankfully, I'm on the WhatsApp group where people mentioned all the prep work.

Andrea Burns 2:36 PM

this may be v2.0 class topic, but are we able to include SMS messages in our workflow in addition to email communications?

Julian Mota 2:37 PM

where is library in the loop?

helena mcleod 2:37 PM

'So does Holler decide to send the email or do you review all of the emails before they are sent. e.g. do you Tyler review the emails before they are sent?

Dr. William Cole 2:38 PM

Will this work with SMS/ Voicemail/ Texting, and Not Just Emails?

May Cheung 2:40 PM

will this work for SMS, whatsapp, messenger, and PHONE response?

Joffrey Berti 2:41 PM

How can we monetize it, for example what would we sell to the client ? the template with Agent, the implementation, etc ?

Glenn Tjon 2:42 PM

I would be great to have dashboard, metrics and KPIs agent as well to track performance of the team.

Can you comment on this?

Alesia Myers 2:43 PM

A human assistant/agent would be able to do all these functions. Is that a technology limitation that will be improved in the future?

Rupal Sheth 2:46 PM

Is it possible to build a Recon agent that does my bank recon or even supplier recon ?

Jeanne 2:48 PM

Can you set this up with Apple Mail? or just gmail?

May Cheung 2:50 PM

Can you comment on using make.com vs n8n? why n8n over make.com? cost? complexity?

Ana Cristina de la Torre 2:51 PM

When we are done, are we going to be ready to make it on our own to our cases? Are we learning how to create the structure you are talking about?

May Cheung 2:51 PM

Please comment on the "cost" for running 1 or 100 emails through this process?

Kamion 2:51 PM

What was your exercise to create the detailed workflow practice?

Gabriele Whyard 2:52 PM

can we do this with mac mail not just gmail?

May Cheung 2:52 PM

Can we create 2 or more different workflow? To save on tokens for creating simple response?

Betsan 2:53 PM

Can make agents that are expert in minority languages. I am first language Welsh. I work 95% in Welsh, thereofre it would be damaging for my reputation if I replied in English to Welsh speakers.

Glenn Tjon 2:54 PM

Agents are created within the workflows. How do you keep track of all the agents and the version control of them?

Anonymous attendee 2:54 PM

Could we have the HITL check happening in Google Chat instead of Slack?

Ana Cristina de la Torre 2:57 PM

Can our knowledge base be anywhere?

Raj 3:05 PM

Along with the templates will we get the prompts used to build the infrastructure/agents/workflow?

Tom 3:17 PM

Where is the pdf?

Darren Sweet 3:17 PM

Could we please get this PDF today? Have lots to do!

Glenn Tjon 3:21 PM

It seems that Claude Code extension is not available for the Web version of VS Code

Wendy Shears 3:23 PM

Is this something you can set up even if you starting a new business but don't have everthing up and running yet?

Audrey Kohli 3:30 PM

Could you explain how uploading file on Claude desktop (semantic) is different from Claude VS

Ching 3:31 PM

Can I have different google login email for Claude code and Claude desktop? Do they need to talk to each other?

Ching 3:34 PM

Also, do we need to have the same google login email for Claude DT and GitHub?

Iva Gasharowa 3:38 PM

How we are sure that Claude really does the work properly. It hallucinate all the time for so obvious things every moment

Derek Egeberg 3:43 PM

i am excited and ready to go 0-100 MPH fast. Want to build this to answer calls, emails, SMS and also convers with customers to take applications, request documents and do follow-up. You're showing me i can more than likely connect this to my database/crm and trigger conversations based on databpoints.

Am I correct in that thought?

Raj 3:44 PM

+1 to @Craig's question. what PC system requirements (RAM, SSD etc.) do you need ?

Ching 3:47 PM

The Claude DT has recently become Claude Code DT. Does it work the same way as it does in VS? Is it safe to use?

Alberto Voli Voli - Puerto Rico 3:50 PM

@Sara/Tyler what do you think of Obsidian as the repository for all our knowledge base - and or what are you recommending to hold all of it?

Panda 3:51 PM

I tried to download the GitHub extension on my computer and Claude kept giving me this error message:  
Error: Claude Code on Windows requires git-bash. If installed but not in PATH, set environment variable pointing to your bash.exe, similar to:

Panda 3:51 PM

Is it because I dont have the Claude pulling from the correct file where Github extension is looking at the correct file?

Marielle Walter 3:52 PM

for my business, i need to set this up for tenants, not "customers", and i need the agent to be able to take service requests for maintenance, and contact maintenance people, but they use phone, not email. is there a way to set this up that they can send a text instead of an email?

Marielle Walter 3:53 PM

or a combination of both?

WButler 3:53 PM

What database solutions have you found successful for storing complex relational data that is part of the knowledge base for the agent, specifically for pricing structures?

We're currently using Airtable, but it's running slowly for the agent I built in Firebase. I'm considering moving the relational data to Supabase while keeping our documents (policies, procedures, etc.) where they are (google drive). Our pricing is heavily relational, so it needs a database that performs well.

Dr. William Cole 3:58 PM

Where is Echo, (echo...echo...echo...)

Kamion 3:58 PM

How do you create a mega doc when a completely new business?

Dr. William Cole 3:58 PM

What actual program do I search for for ECHO?

Tammy 4:08 PM

Can you explain the differences among visual sutido code vs claude code on desktop, Claude code on the web? I am getting confused if we need to upload gitbit through the claude Code or Visual studio? Everything is moving so fast

Dr. William Cole 4:12 PM

Can you make a list of Most Common tip/ errors???

Rosy 4:14 PM

This is a good idea. Would appreciate common pitfalls.

Ales 4:17 PM

I wanted to ask about the dictation tool Tyler is using as I am using Ito.ai but now it is newly payed after 4000/words a week. Because I really love the dictation fuction. Is this the one?

<https://goodsnooze.gumroad.com/l/macwhisper>

sharda 4:18 PM

Do we need to download the documents which were shared via Github?
